

week 5 log

This week I mainly worked on creating webapp using shiny and data visualization. I spent a total of 6 hours doing this task.

```
library(ggplot2)

# Create a data frame with tasks and time spent
task_data <- data.frame(
  Task = c("creating webapp", "creating visuals"),
  Hours = c(4, 2),
  Week = c("Week 5", "Week 5")
)

# Generate a bar chart
ggplot(task_data, aes(x=Task, y=Hours)) +
  geom_bar(stat="identity", fill="green") +
  ggtitle("Time Spent on Tasks This Week") +
  xlab("Tasks") +
  ylab("Hours Spent") +
  facet_wrap(~Week) +
  theme_minimal()
```
